---

*I am a frontend developer with over 2 years of experience in creating and developing functional and secure web platforms for large industries. I have led frontend development a team and collaborated with designers, backend developers, and project managers to deliver solutions that enhance application efficiency.*

## EXPERIENCE

---

### ActionTracker Solutions SL

Frontend Development Lead - Frontend Developer

Barcelona, Spain · Remote

Diciembre 2021– Junio 2024

I began my journey at ActionTracker Solutions SL as a frontend developer, joining the team responsible for developing a Monitoring and Security platform aimed at large industries. After a year, I was promoted to Head of Frontend Development, taking on the responsibility of leading the frontend team until the project's completion.

- Implementation of roles and permissions within the system, including the creation of specific screens for its management.
- Development and integration of audible and visual alarms using the MQTT protocol.
- Consumption of REST APIs for communication between frontend and backend.
- Development of features for uploading and downloading files in multiple formats across the application.
- Application of reactive programming with Angular +2, optimizing data updates and server requests.
- Adapted and enhanced existing modules in the application according to the design changes proposed by the UX/UI team.
- Implemented responsive design across all screens, ensuring a consistent user experience on both mobile and desktop devices.

Key technologies used: Angular 11, TailwindCSS, Angular Material, Flexbox.

### Prisma Hexagon

Frontend Developer

United States · Remote

Jun 2021–August 2021

I collaborated with the Frontend development in the admin panel, as well as administration panel, as well as adjustments and implementation of modules for the base CRM system with the Angular framework (TypeScript) with framework Angular (TypeScript) using TailwindCSS.
